

## CARE INSTRUCTIONS

Caring for wood and epoxy furniture involves several key steps to ensure its longevity and maintain its beauty. Here is a guide to help you:

- 1.Regular Dusting:** Use a soft, lint-free microfiber cloth to dust the surface regularly. This prevents dirt and debris from accumulating.
- 2.Avoid Abrasive Cleaners:** Steer clear of abrasive cleaners or scrubbing pads, as they can scratch both the wood and epoxy surfaces.
- 3.Avoid Chemicals:** Avoid using chemicals or alcohol-containing products to clean the wood or epoxy surfaces, as they can remove wood finishes and cloud epoxy surfaces.
- 4.Control Environmental Factors:** Keep the wood and epoxy furniture away from direct sunlight and extreme temperature changes. These factors can lead to discoloration of the epoxy and warping of the wood.
  - a.Dehumidifier:** Using a dehumidifier, especially in the summer when temperature and humidity levels are high, can remove extra moisture from the air and protect your wood from warping.
- 5.Use Protectors:** Always use coasters, placemats, and trivets to protect the table from heat and scratches.
- 6.Restore shine:** If the epoxy surface appears dull, apply a non-toxic marine wax (like Meguiar's) to restore shine. Follow the product instructions closely for best results.

By following these steps, you can keep your wood and epoxy table looking beautiful for many years.
